

CASE STUDY

When your team hits capacity, who builds what's next?

A global insurer needed to deliver a critical .NET claims solution, but their internal team was stretched thin. They needed expert developers who could hit the ground running.

THE CLIENT

A Global Insurance Leader

As part of the Blueprint Two initiative, this leading organisation needed to develop a tailored .NET solution for claims processing. Their internal development team faced resource constraints that threatened project delivery timelines.

"We needed a team that could integrate seamlessly with our existing processes while maintaining our strict security and compliance standards."

INDUSTRY

Insurance

FOCUS

Software Development

INITIATIVE

Blueprint Two Strategy

THE CHALLENGE

Four critical hurdles to seamless delivery

Resource Gap

Insufficient internal development resources to complete the project on schedule

Security Standards

Ensuring adherence to strict security policies and software development standards

Team Coordination

Coordinating a multidisciplinary team across development, testing, and project management

Tech Stack

Operating within the client's existing technology stack and tools like Virtuoso

THE JOURNEY

How we made it happen

1

Embed & Align

- Deployed .NET Angular developers with front-end and back-end expertise
- Listened deeply to understand team dynamics and constraints
- Provided dedicated testing team, BA, and delivery lead
- Ensured compliance with all security policies throughout

2

Build & Test

- Set clear expectations for deliverables and timelines
- Tailored solution to technical and business requirements
- Operated autonomously within client's development department
- Conducted all testing using client's stack including Virtuoso

3

Deliver & Iterate

- Facilitated weekly meetings to review progress and risks
- Resolved blockers swiftly to maintain momentum
- Refined roadmap based on evolving requirements
- Achieved seamless handover with minimal client effort

THE TRANSFORMATION

From resource gap to delivery excellence

BEFORE

Stretched internal team unable to meet project demands, risking Blueprint Two timelines

AFTER

Fully integrated development team delivering compliant .NET solution on schedule

THE FUTURE

Built to last, ready to scale

By providing expert development resources and project leadership, Engaging Data successfully delivered a tailored .NET solution for claims processing, ensuring adherence to security standards while enabling the client to achieve their strategic Blueprint Two objectives.
