BiG EVAL DATA TEST AUTOMATION
V 1.1

"By using test and data warehouse automation we succeeded with a very small team to develop an agile, future-proof BI landscape. Without automation this wasn't imaginable!"
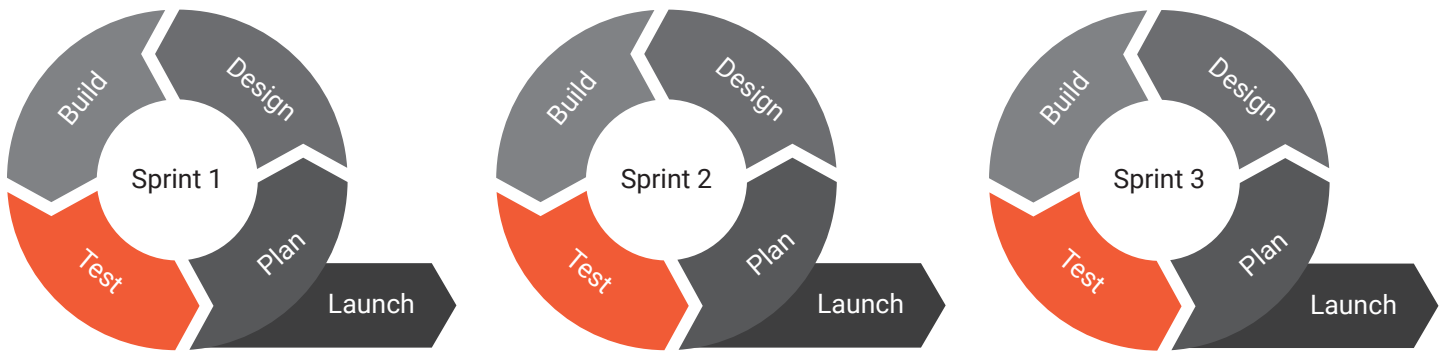

Sören Schubert
Business Application Specialist

WHAT YOU GET

TECHNOLOGY NEUTRAL TESTING SOLUTION

The concept of BiG EVAL Data Test Automation allows testing all datasets, independently from its technology. Integrate all kind of databases, files, cloudservices as well as legacy systems into your test cases.

FLEXIBLE TESTING LOGIC

Use ready-made test case logic optimized for data warehouse and business intelligence. Or implement your very own logic by using the flexible scripting features of BiG EVAL.

BEST PRACTICES

BiG EVAL Data Test Automation comes with best practices templates for data warehouse and BI-solutions:
• Comparisons for datasets, attributes, meta data, objects
• Consistency checks, duplicate checks, value distribution tracking etc.

YOUR BENEFITS

• A **standard software solution in Swiss quality** to automate and scale your data warehouse and BI test processes

• **Alerting- and decission-processes** when errors arise with comprehensive analysis

• **Realize short release cycles in agile projects** by automating manuel testing processes

• **More time** for implementing new user stories instead of manually testing

• **Quality Gates** allow to continuously deploy your system depending on the testing results

• **Control** and a central overview
