# HOW SANLAM LEVERAGED WHERESCAPE TRAINING TO STREAMLINE DATA PROCESSES.

## AT A GLANCE

### KEY TRAINING TAKEAWAYS

- Efficient Data Designs
- Data Governance Enhancement
- Data Discovery Mastery
- Automation and Time Saving

### POST TRAINING BENEFITS

- Accelerated Data Insights
- Enhanced Efficiency
- Informed Decision-Making
- Operational Agility

## OVERVIEW

To enhance their data prowess, Sanlam enrolled in Engaging Data's comprehensive Training course on WhereScape 3D and WhereScape RED.

This case study delves into Sanlam's training experience, highlighting the insights gained and how they have leveraged this knowledge to streamline their data processes.

Sanlam is a distinguished financial services group known for its diverse offerings, including insurance, investments, and wealth management. With a strong commitment to innovation and customer-centric solutions, Sanlam is a trailblazer in the financial sector.

## TRAINING OVERVIEW

Sanlam participated in our WhereScape 3D and WhereScape RED training course. This training course encompassed:

**WhereScape 3D Training:** Sanlam's team delved into the intricacies of data discovery and design with WhereScape 3D. They gained insights into how to visualise and model data for optimal insights.

**WhereScape RED Training:** The training equipped Sanlam's team with advanced skills in Data Warehousing using WhereScape RED. This included automation data pipelines, accelerating data integration and enhancing data governance

# KEY TRAINING TAKEAWAYS

- Efficient Data Design:** Sanlam’s teams acquired the skills to design data pipelines efficiently using WhereScape 3D, leading to streamlined data architecture.
- Data Governance Enhancement:** With WhereScape RED, Sanlam’s team learned how to create automated workflows, enhancing data governance and transparency.
- Data Discovery Mastery:** The training empowered Sanlam's team to explore and discover insights hidden within complex data sets using WhereScape 3D
- Automation and Time Saving:** Sanlam’s team harnessed the power of WhereScape RED to automate Data Warehousing processes, saving valuable time and resources.

## POST TRAINING

- Following the training, Sanlam’s team seamlessly integrated their newfound knowledge into their data operations:
- Accelerated Data Insights:** By implementing WhereScape 3D’s data discovery techniques, Sanlam’s team accelerated the processes of uncovering valuable insights from their data.
  - Enhanced Efficiency:** Utilising WhereScape RED’s automation capabilities, Sanlam’s team streamlined their data pipelines, reducing manual efforts and increasing efficiency.
  - Informed Decision-Making:** With improved data governance and timely data insights, Sanlam’s leadership made more informed strategic decisions.
  - Operational Agility:** Sanlam’s team exhibited enhanced agility in adapting to changing data requirement, resulting in a more responsive approach to business changed.

## FUTURE PLAN

- Through the engagement from Sanlam’s team in the WhereScape 3D and WhereScape RED training course, that we supply, it exemplified the potential of skill-building in optimising data pipelines and yielding the power of data automation.
- By investing in training, Sanlam empowered its team to unlock the full potential of their data, from efficient data design to streamlined data warehousing.
- As Sanlam continues to excel, their dedication to training underscores the value of upskilling and leveraging advanced tools for data-driven success.
